INTRODUCTION

'Tea Statistics' published by the Statistics Branch of the Tea Board has already npleted three years of useful existence and with the publication of the present issue it will nbark on the fourth year of its life. It is our earnest hope that it will be received with the ame enthusiasm and cordiality as in the past. Economists, research workers as well as individuals and organizations interested in the study of conditions in the Tea Industry and Trade may, find the present issue more useful than its predecessors. The object of the publication remains, as before, to present in a concise form detailed information regarding different aspects of the Tea Industry and Trade in India as well as the more important basic information regarding the position of tea in other important producing and consuming countries of the world.

As before, this volume incorporates the latest statistical information relating to different aspects of the Tea Industry and Trade available at the time of going to press. Some of the figures are, therefore, necessarily incomplete or provisional. Figures have in most cases been taken from sources generally regarded as authentic although in some cases less dependable sources also have had to be drawn upon. It is, however, hoped that the errors due to such limitations will not vitiate to any considerable extent, the picture brought out by the figures incorporated in the publication. Nevertheless, suitable indications have been given, as far as possible, in respect of figures that have to be treated as provisional.

It has been our sincere endeavour to maintain the process of gradual growth so that every issue is more useful and informative than the preceding issue. The present issue includes 81 tables against 75 tables included in the last issue. Of the six additional tables, five are in Part I (India) viz. table 1 (iv) showing tea produced in North India in 1955 and 1956 classified as black tea and green tea, table No. 1 (vi) giving tea area as percentage of total area under cultivation and the average size of holdings in each tea-growing State of India, table No. 14 (b) showing weekly average retail prices of loose and packet teas at Calcutta during 1956 and 1957, table No. 31 showing consumer price index numbers for plantation workers and table No. 32 showing index numbers of wholesale prices of tea and other important commodities. Table No. 22 in Part II (international) showing acreage under tea in India and Ceylon classified by sizes of estates is also a new feature.

Besides these additional tables, a number of tables which were included in the last issue have been enlarged so as to give a greater amount of information or information for a larger number of years.

Ever since the inception of this publication, we have been receiving suggestions from different quarters for further enlargement of its scope and coverage. Some of these suggestions have already been accepted and implemented. Some others have had to be kept in abeyance either because their acceptance would make the publication too bulky or because the information required was not readily available or the suggestions could not immediately be given effect to due to paucity of staff. However, all the usefull suggestions that we have not yet been able to give effect to are constantly before our mind and we hope to be in a position to do better justice to them when we are properly equipped for the purpose.

The separate publication containing results of sample surveys conducted by us promised in the introduction to the last issue of 'Tea Statistics' has already been brought out in August 1957. The second issue of that publication entitled 'Tea Surveys' is expected to be available by the end of August this year. Nevertheless, a table containing the most important items of information collected through these surveys has been included in the present issue of the 'Tea Statistics' as before.

Note : (1) Estimates of internal consumption do not take into consideration variations in stocks held in retail channels. In other words, the estimates are based on the tacit assumption that stocks in retail channels remain more or less the same in any two consecutive years. In case there is any large variation in retail stocks as between to consecutive years, the accuracy of the estimate of consumption will be vitiated to that extent. However, such unusual variations are rare and are likely to smooth out over a period of about 3 years. A 3-year moving average of the original estimates arrived at will, therefore, afford more reliable estimates of consumption of tea in India.

Note : (2) The above figures, particularly the State-wise distribution of total consumption, are subject to revision.

The slab system of export duties effective from 1st March, 1955.

Price per lb.	Duty per lb.
Upto Rs. 2·50	25 nP.
Rs. 2·50 to Rs. 3·25	38 nP.
Rs. 3·25 to Rs. 4·00	50 nP.
Rs. 4·00 to Rs. 4·75	62 nP.
Above Rs. 4·75	75 nP.

N. B. :—In the Finance Act of 1956-57, the slabs Rs. 2·50 to Rs. 3·25 and Rs. 3·25 to Rs. 4·00 have been amalgamated with the result that the duty applicable to teas whose price falls in the revised slab of Rs. 2·50 to Rs. 4·00 would be 38 nP. only. This revision took effect from 1st April, 1956.

* 6 nP. for internal loose tea and 25 nP. for packet tea upto 60 lbs packet with effect from 15-4-53. Excise duties collected on teas which are eventually exported out of India are credited to customs.

** From 25th Nov. '54 cess on teas has been increased from Rs. 2/- to Rs. 4/- per 100 lbs. of tea.

N. B. The Government of India has decided that the excise duty on teas which are not used in the manufacture of packaged tea should be reduced to half anna a pound. According to the Press note issued by the Ministry of Commerce and Industry, the Government has also decided that the cess of Rs. 4/- per 100 lb. levied on teas exported outside India under the provisions of section 25(1) of the Tea Act, 1953 should be halved.

The Concessions which are designed to provide some immediate relief to the tea industry will be effective from June, 1, 1958.
